

PABX EXTENDER

The PABX Extender provides a transparent dial-up link between a central phone system and any remote location

Facilities of the central PABX analogue extension are extended to the remote location. Calls answered at the remote location can be transferred back to the central location

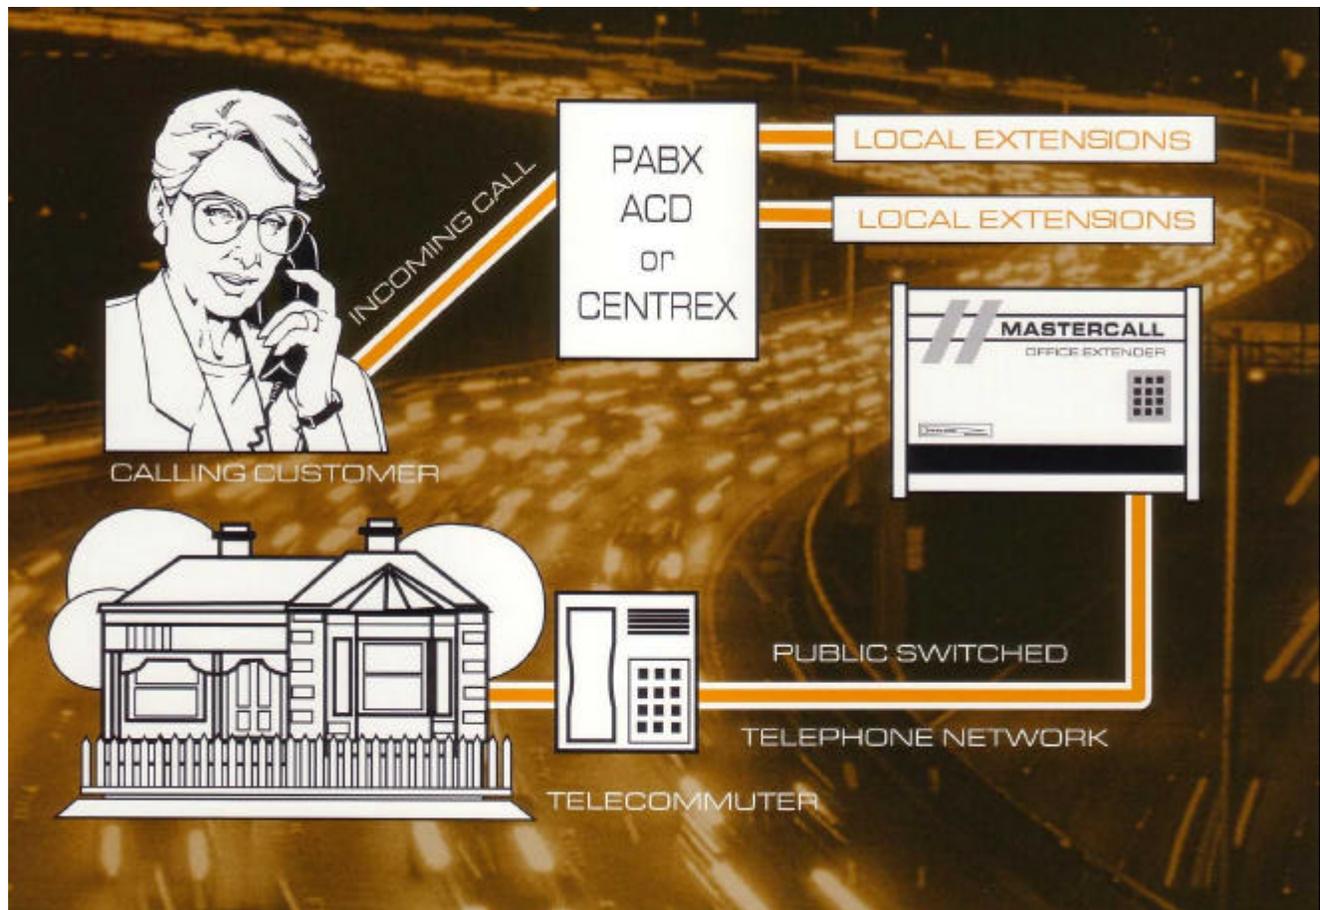

APPLICATIONS

- ❑ Allows remote agents to have full access to the main office PABX for business related calls, while appearing to callers as if they are actually in the office.
- ❑ Allows remote agents to make outgoing calls via the main PABX.
- ❑ Allows remote agents to dial in and log on to a PABX ACD queue and act as local agents.
- ❑ Allows Supervisors at any location to remotely monitor calls for coaching/training purposes and quality call management.

FEATURES

- ❑ PIN access security
- ❑ Hook Flash for call Hold, Enquiry, Recall and Transfer facilities
- ❑ Standard DTMF Control
- ❑ Duplex Voice Amplifier

INSTALLATION DIAGRAM

SPECIFICATIONS IN BRIEF

Power Input	10 → 56Vdc. (240Vac/12Vdc 750mA power adaptor supplied)
Line Connectors	RJ12
Remote Control	'Touch Tone' DTMF with Talk-back
Desk Top Dimensions	W350mm x D240mm x H25 - 60mm
Rack Mount Dimensions	1RU, 19" standard. W 19" x D250mm x H44mm
Packed Weight	3.5 kg
ACA Supplier's Code	N 468
