# TIPT UNIVERSAL PA INTERFACE VoIP-4950PA

The VoIP-4950PA allows Telstra IP Telephony (TIPT) customers to make voice announcements over their PA system from any phone or terminal on their TIPT network. Access to the PA can even be set up as a one touch function. Simply call your PA extension and you're connected. Simply hang up after your announcement.

The device is a simple "one suits all" PA interface with all interconnection accessories supplied as standard.
